# CITY IN NATURE

## “CITY IN NATURE” KONZEPT

Conversion Singapore's into a „City in Nature“, where nature is reimmersed and integrated into the urban landscape. Development of Singapore to the most sustainable city destination. 50% more land is planned for nature-concepts:

1. 10 minutes walk for every household to the next park or nature reserve
2. Intensifying nature in gardens and parks and restoring nature in the urban landscape
3. Planting of an additional 1 mil trees.
4. Strengthening connectivity between Singapore's green spaces

# CITY IN NATURE

## SUSTAINABLE LIVING AND ENERGY TRANSITION

Making life more sustainable and integrating nature into the built environment is our goal, among others:

1. Greening of 80 % of all buildings in the next ten years
2. Local production of 30% of our food needs by 2030 (30-by-30 goal).
3. Increase the share of journeys made by public transport to 75% by 2030.
4. Expansion of the bicycle network to 1,320 km by 2030
5. Expansion of the rail network to 360 km by the early 2030s
